

Avaya Softconsole™

Increase attendant productivity to serve your customers better

Avaya Softconsole is a newly designed software attendant console that builds on the features of the popular Avaya 302 Attendant Console. With its ability to search internal and external directories, place a caller's e-mail address into your e-mail application and display detailed caller information on up to six calls simultaneously, Softconsole brings more productivity to the attendant's experience.

Avaya Softconsole improves the user experience through a new interface, comprehensive setup wizards, email integration and enhanced directory capabilities.

The Avaya Softconsole is Windows™ based, supports standards-based integration of applications to deliver enhanced functionality; and helps you do more with fewer resources.

Its connectivity to Avaya Communication Servers can be either digital or IP. For digital connectivity,

the attendant's PC will connect into a Callmaster® VI. Using an IP connection, the attendant's headset can either plug into the PC sound card to take advantage of true VoIP roadwarrior single connect mode, or the attendant can use a separate telephone if using the telecommuter dual connect mode.

Facilitate closer relationships between customers, employees and suppliers

Softconsole improves the user experience through the following functionality:

- Brings more information and capability to the attendant
- Has all the features of high-end attendant phones
- Includes user customization of the displays
- Pulls records regarding the calling party
- Use note-taking area and records about the calling party
- Company directory availability
- Improves the attendant's capability while saving desk space.
- Improves user experience

Features

- Choice of two IP connections or DCP connection
 - Voice over IP configuration (road warrior)
 - Dual connection (telecommuter) for toll quality audio
 - DCP connection using the CallMaster VI or 8411D
- Integrated iClarity for IP audio
- Directory lookup and dialing
- Integrated with MasterDirectory to support up to 100 directory databases
- Integration with LDAP directories
- DXS/BLF directory display and dialing
- Alternate dial numbers
- Ring through the PC sound card
- Permanent and per call notes
- Send email from Softconsole
- Configuration Manager wizard
- Download switch settings into Configuration Manager
- User assigned hotkeys
- Feature buttons display tool tips

Minimum Requirements

- Avaya MultiVantage Software or DEFINITY R9.5 or later for DCP connectivity
- IP enabled Avaya Communication Server running Avaya MultiVantage or DEFINITY Release 10 for IP connectivity

- A personal computer with a Pentium® based processor with a minimum of 400 Megahertz clock speed
 - 128 MB of RAM available to Softconsole application (256 mb recommended for IP single connectivity)
 - CD-ROM drive
 - Microsoft Windows 2000 with Server or Professional Service Pack 2 or later, Microsoft Windows XP Professional with service pack 1 or later.
 - 15" color monitor, 17" or larger recommended
 - Microsoft Internet Explorer 5.5 or higher (for online help)
 - DCP Connection:
 - A COM Port dedicated to Softconsole. (No other application may vie for this port.)
 - A sound card (to generate the ringing sounds).
 - IP Connection:
 - A sound card that supports full duplex operation.
- Headset
- Network Interface Card (NIC) for Local Area Network (LAN) connectivity in IP environments.
- 30 MB of hard disk space are required for the Softconsole software, plus additional space for Softconsole directory information.
